

S M -61 HAMPTON
Medley's Neck
Private

1748/early 19th century

Laid in glazed headers across the north gable of Hampton are the numerals "1748," making it the earliest dated building in St. Mary's County. A one-story dwelling of Flemish bond brick, it has four bays across the front and two on the rear facade. The plan originally had hall and parlor in front with two rooms and a central stair hall behind. The house underwent a major alteration in the second quarter of the 19th century: the chimneys were rebuilt, the front windows made over into French windows, the plan altered in the rear, the stairs rebuilt and the woodwork of the first floor updated. Circa 1920 two flanking wings were built and long, shed dormers added to the original house.
